Note:

These Herbal remedies are Formulated to be Safe and Effective and all remedies in this catalogue that require registration are listed with the Medicines Control Council.

INTRODUCING THE REMEDIES

These remedies have been made and dispensed since 1995 and all the remedies are based on exclusive research conducted by Wilma van der Walt, who is a graduate of the College of Herbal Medicine in London, UK. A ninth generation South African, Wilma has combined her knowledge of European herbalism with the use of indigenous herbs with great success.

Certain of our own additional remedies have been added which have healing properties. These product names are prefixed with MBSS (Mind Body, Soul & Spirit)

These remedies create opportunities for healing. We are responsible for our bodies; we are also responsible for what we eat and what remedies we take. Once we accept that responsibility ourselves, we do not allow other people (doctors, specialists and surgeons) to dictate our lives.

We become more careful with the things we put our bodies through and then automatically avoid harmful substances.

We can only create an abundance of health by taking charge of our own healing.

We open the minds of those who consult us, asking them to take charge of themselves, their healing and their lives. The range of natural remedies have proved themselves again and again to be effective and entirely safe.

This is our gift to you!

HERBAL REMEDIES - HOW THEY WORK

Herbs are plants that are Used for food and medication. Herbal remedies are prepared from pure plant material. The plants used are organically grown (certified) and not genetically interfered with. A Herbal remedy should never contain artificial preservatives, colourants, flavourants or other additives.

In making herbal remedies the complete plant is used, which, in the process of its growth, manufactures substances in a natural and balanced combination to be beneficial to body and mind. As soon as a substance is isolated from the plant or it is synthesized, the resultant preparation has lost its balance and causes undue side effects which in turn must then be treated.

By refusing to isolate substances from herbs and by using natural processes of extraction, the high-quality remedies that are produced, are balanced and natural to the body's internal environment.

Herbal remedies always have inherent benefits and bring with it, apart from the formula-directed healing, a host of indirect benefits:

Herbs always restore the internal balance of the body, ensuring and supporting the body in its own healing process

Herbs are always cleansing, ridding the body of toxins (preservatives, colourants, additives) which we ingest on a daily basis. These toxins can cause endless diseases and by removing them from the system, herbal remedies strengthen the body.

Herbs always tend to do more in activating the deeper immune system than other medical systems. Herbs also address the surface immune factors such as micro-organisms and pathogens very successfully. Herbs are inherently adaptogenic, improving the body's ability, assisting us in coping better with pressure.

Herbs always act as tonics, nourishing and toning, aiding and improving the structure and performance of tissues, organs and systems.

Herbs are healing.

HOW TO USE THE HERBAL REMEDIES

These Herbal Remedies are prepared in easy-to-use teas, droplet bottles, ointments, lotions, creams, powders and capsules. The remedies will not normally cause a reaction when used together with conventional medicine, but may sometimes not work as effectively. It is advisable to consume conventional medicine first, wait for 2 hours prior to consuming herbal medicine, in order to avoid interaction.

Where an ingredient may affect pregnancy, epilepsy or have a reaction with conventional medicine, appropriate warnings are given. It is also important to remember that unlike conventional medicine, more does not necessarily mean faster, so it is best to keep to the prescribed Ingredients. The formulations are well balanced to be entirely safe.

Individual herbs are available in tinctures or capsules. The tinctures are produced from fresh plant material as far as possible. All tinctures are of a standard 1:5 potency, unless otherwise specified, ensuring a higher nutrient content than most herbal tinctures. The capsules are made using only pure dried, ground herbs, no fillers are used and weights are guaranteed.

Dosages for children are as follows (part of adult dose):

0-1 years -- 1/20th	9-10 years -- 1/2
1-2 years -- 1/10th	11-12 years -- 3/5ths
3-4 years -- 1/5th	13-14 years -- 4/5ths
4-6 years -- 3/10ths	15 years and older -- full adult dose
7-8 years -- 2/5ths	

The elderly, due to slower metabolism, may require less than the full dose.

People over 70 should take 3/4 of the adult dose.

Ensuring you of a speedy recovery and great health!

INDEX OF AILMENTS TREATED

The following is a list of ailments for which we provide Herbal Remedies. Each remedy is listed with the **Ingredients**, **Usage**, **Packaging** and **Dosages**.

In many cases we provide more than one recommendation. In these cases, you could opt for one or more of the recommendations. As these remedies are very affordable and do not carry the very risky and negative side-effects frequently found in conventional medication.

Abscesses

Calendula extract, Comfrey capsules

Abscesses, mouth or gums

Mouth wash

Absent menstruation

Amenoreo

Acidity

Acedeo

Acne

Acneleo, Acneleo cream, Calendula cream, Calendula ointment, Comfrey capsules

Equivalent:	
Note:	WARNING: PREGNANT AND LACTATING WOMEN AND HYPERTENSION SUFFERERS SHOULD NOT USE HF&D AT THRE MAXIMUM LEVEL. Description: The natural fibers of herbs cleanses and detoxifies and acts as a natural diuretic and mild laxative, helping the body eliminate parasites, soothes an irritated digestive tract and mucus membranes. High levels of nutrients rejuvenate and nourish bone, skin, hair and nails. Psyllium cleanses the gastro intestinal tract of toxins, promoting tissue healing. Marshmallow is anti-septic and anti-inflammatory. Fibre also lowers cholesterol levels, stabilises blood sugar levels, regulates the bowel, preventing constipation and haemorrhoids and has been found useful in weight reduction programmes.

Packaging:	Jars of 25gm and 50gm.
Equivalent:	
Note:	
Product:	Variceo Cream
Used For:	Topical application for varicose veins.
Ingredients:	Extracts of Calendula, Comfrey, Lemon, Cypress, Feverfew, Horse chestnut & Butcher's broom in a cream base.
Dosage:	Apply to affected areas at least twice per day.
Packaging:	Jars of 50ml.
Equivalent:	
Note:	
Product:	Xtreme Cream
Used For:	Deeply moisturizes and heals extremely dry, cracked, or scaly skin, rough heels, and elbows.
Ingredients:	A purified water-free wax-like emollient derived from sheep's wool that forms a heavy protective barrier to lock moisture into the skin.
Dosage:	Warm it up first: Apply to damp skin: Target dry zones: It excels on targeted rough spots rather than as an all-over body lotion. Use it daily on cracked lips, ragged cuticles, rough elbows, and severely dry heels. Put socks on after applying at bedtime to avoid slippery floors.
Packaging:	Jars of 30gm and 50gm
Equivalent:	
Note:	Use on rough-feeling heels, elbows, and similar areas. Safety Instructions: For external use only Patch test before first use Discontinue use if irritation occurs Keep out of reach of children.

CREATION gifted us with a multitude of plants to be used as healing medication. Herbs are the medicine of the earth. For every wound on earth there grows a medicine.

May we ever have gratitude in our hearts that the great Creator in all His glory has placed the herbs in the field for our healing.
